

Nezaal Ahmad

Delhi – 110025 | +91-9971698891 | ahmadnezal19@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Profile

4th-year CSE (AI/ML) student at Galgotias University shipping AI-native full-stack systems end-to-end — from LLM pipeline architecture and async backend orchestration to production-ready React interfaces. Focused on building scalable, structured-output AI products for real-world deployment.

Technical Skills

AI / GenAI	Google Gemini API, Prompt Engineering, JSON Schema Constraints, Local Embeddings
Backend	Node.js, Express.js, REST APIs, JWT Auth, Controller-Service Architecture, Mongoose
Frontend	React.js (v19), React Router, Tailwind CSS, Vite, Sass, HTML5, JavaScript (ES6+)
Databases	MongoDB (subdocuments, data modelling), Supabase (PostgreSQL), MySQL
ML / Data	Python, NumPy, Pandas, Scikit-learn
Tools	Git, GitHub, Postman, VS Code
Core CS	DSA, System Design, OOP, Computer Networks, OS, DBMS

Projects

SkillBridge AI — AI-Native Job Preparation Platform [GitHub](#) [Live Demo](#) Mar 2026

React 19 · Node.js · Express · MongoDB · Google Gemini API · JWT · @xenova/transformers · Vite · Sass

- Decoupled ATS match-scoring from the LLM by building a deterministic scoring service using local sentence embeddings with cosine similarity, cutting per-report API cost and eliminating score non-determinism.
- Parallelized independent Gemini (gemini-2.5-flash) API calls in the report-generation flow, cutting end-to-end resume-analysis latency by **7–8 seconds**.
- Shipped OAuth 2.0 login (Google & GitHub) alongside the existing JWT flow, with secure callback handling and client-side routing fixes for reliable session persistence across refreshes.
- Architected an AI-native backend pipeline with enforced JSON schema constraints, delivering structured interview reports — technical, behavioural, and skill-gap analysis — with **100% schema-compliant outputs**.

K72 Portfolio — Motion-Driven Agency Site Clone [GitHub](#) [Live Demo](#) Sep 2026

React 19 · Vite · Tailwind CSS v4 · GSAP · @gsap/react · React Router v7 · Vercel

- Rebuilt the award-winning [k72.ca](#) agency site as a React 19 + Vite SPA, reconstructing its full-bleed typographic layout and motion language from scratch using Tailwind CSS v4 utility styling with a Vite-native build pipeline.
- Engineered the site's animation layer with GSAP timelines scoped through **@gsap/react (useGSAP)**, driving masked text reveals, a full-screen navigation overlay, and hover-state transitions with automatic context cleanup on unmount to prevent animation leaks across route changes.
- Structured multi-route navigation with React Router v7 and a component-isolated architecture separating layout, motion, and page logic — keeping animation state contained per route and the render tree free of reflow-heavy DOM thrash.

Experience & Activities

Technical Leading Member 2025 – Present

Supercomputing & AI Club, Galgotias University

- Lead a student technical team building GPU-accelerated AI/ML projects and workshops, guiding members through model training pipelines, and applied deep learning use cases.
- Own technical planning and execution for club initiatives, translating NVIDIA developer resources into hands-on sessions and project tracks for **peer members**.

Outreach Coordinator Sep 2025 – Oct 2025

IEEE Galgotias University Student Branch

- Orchestrated outreach operations for ICCSAI 2025 across a **15+ member** cross-functional team; secured **10+ qualified sponsor leads** via targeted cold-email campaigns and professional networking.

Education

B.Tech — Computer Science & Engineering (AI/ML Specialisation) 2023 – 2027

Galgotias University, Greater Noida *Coursework: DSA, DBMS, OS, Computer Networks, Machine Learning*

Certifications

Oracle OCI AI Foundations	Sept 2025	Verify
Google AI/ML Virtual Internship	Jul – Sept 2025	Verify
Guvi Data Science & Analytics	Jun 2025	Verify
